

You have free days. **We tell you where and when.**

TripAI starts from your free days and shows where every price comes from.

Ola, 29, Kraków. Free 7–11 Nov.

“Where should I go, and is this even the right weekend?”

Agencies sell a package without reasons. Booking sites want a destination first.

89%

of travellers want AI to help plan

12%

would let it decide on its own

Booking.com, Global AI Sentiment Report (2025): 37,000+ consumers in 33 markets

Fourteen swipes, then a ranked list for her dates

Ola tells TripAI what she likes. It ranks trips for 7–11 Nov, two days of leave for five days away.

Every price says where it came from

If a fare was seen for other dates, or a stay is a city average, the trip page says so.

How the ranking is made

- 1 Prices, weather, crowds and Polish holidays come from named sources.
 - 2 A fixed formula orders the trips. The same inputs give the same order.
 - 3 AI checks the fit with your taste and explains it. It never sets a price or the order.
-

It keeps looking after you close the app

A daily scan checks your free days against new prices and only pings you when something is worth it. A chat assistant answers when asked.

Google Flights, Kayak AI Mode, Mindtrip and eSky MAIA each cover part of this. None starts from your free days.

Revenue comes from bookings, not from placement

0 PLN

for travellers

~36 PLN

partner commission on a 1,800 PLN trip, at an assumed 2%

~19 PLN

a month for Premium alerts and group trips, still to be tested

Commission is not an input to the ranking.

Long weekend, 7–11 Nov. Where would you go?
