You have free days. We tell you where and when.

A trip planner that starts from your free days, and shows
where every price comes from.

Meet Ola. Free days, no plan.

Ola, 29, Kraków

Free 7–11 Nov, a long weekend.
Budget 1,800 PLN. Hates crowds.

"Where should I go, and is this even the right weekend?"

Travel agencies are opaque

A package and a price. No reasons.

Booking sites start from a place

Not from your free days. You do the matching.

How it works

1

Sourced data

Flights, hotels, weather, crowds, Polish holidays and bridge days

2

A fixed formula ranks

Price, weather, crowds, taste. The same every time.

3

AI checks the fit

A small model judges the fit. An LLM steps in only when it's unsure, and writes the "why".

AI never sets a price or the order.

A chat waits to be asked. TripAI keeps watching.

Starts from your free days

Every free window and every city on our list, searched in one pass.

Explains every pick

Why it fits you, from your own answers and sourced numbers.

Watches every day

A daily scan of your free days. Finds land in the inbox; it pings only when one is worth it.

Google Flights, Kayak AI Mode, Mindtrip and eSky MAIA each cover a piece. None combines your free days, your taste and sourced prices.

We earn on bookings, never on ranking
