

HackYeah 2026 · TripAI

You have free days. *We tell you where and when.*

A trip planner that starts from your free days, and shows where every price comes from.

[Team name] · [Members]

Meet Ola. Free days, no plan.

Ola, 29, Kraków

Free 7–11 Nov, a long weekend.

Budget 1,800 PLN. Hates crowds.

“Where should I go, and is this even the right weekend?”

Travel agencies are opaque

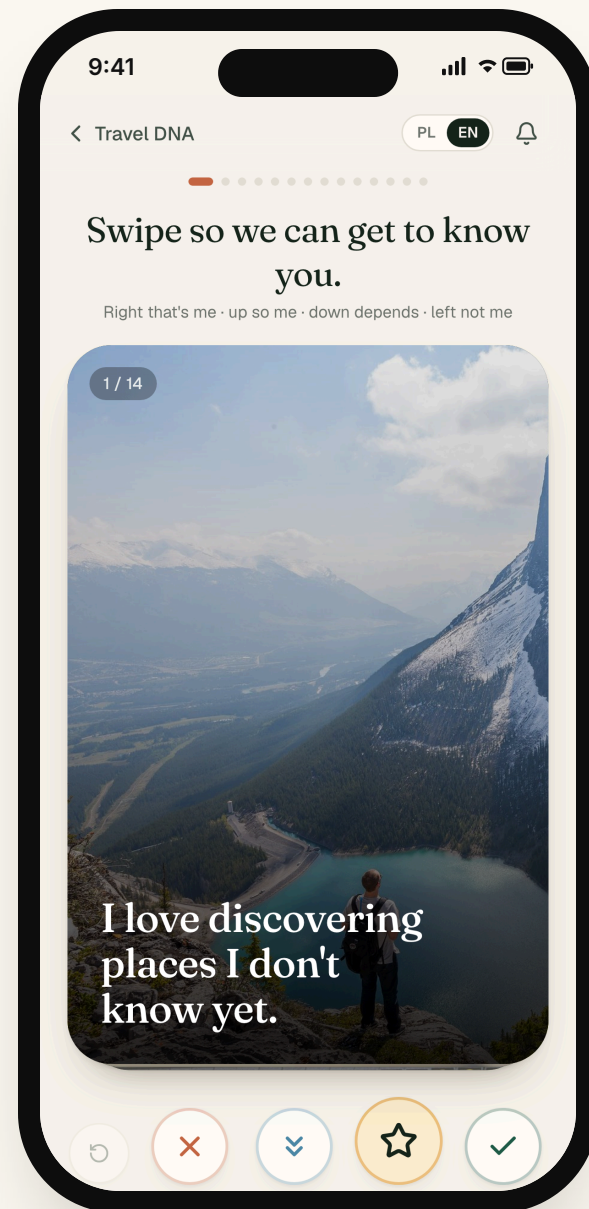

A package and a price. No reasons.

Booking sites start from a place

Not from your free days. You do the matching.

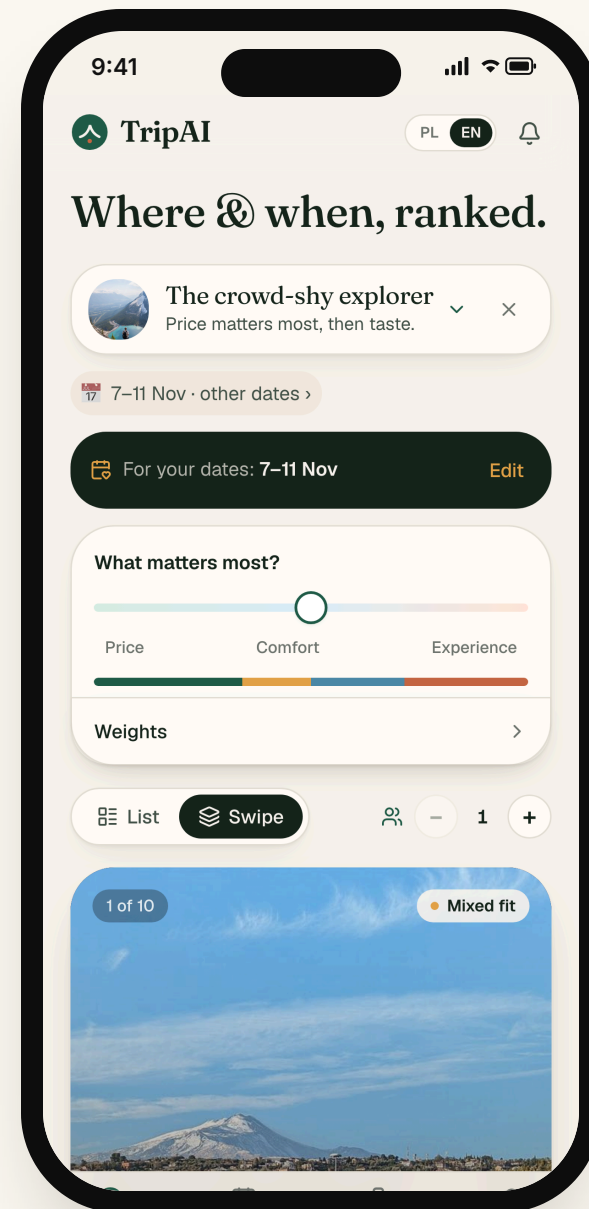

89% want AI help planning trips. Only **12%** would let AI decide alone. Trust is the gap.

Free days in, a checkable trip out

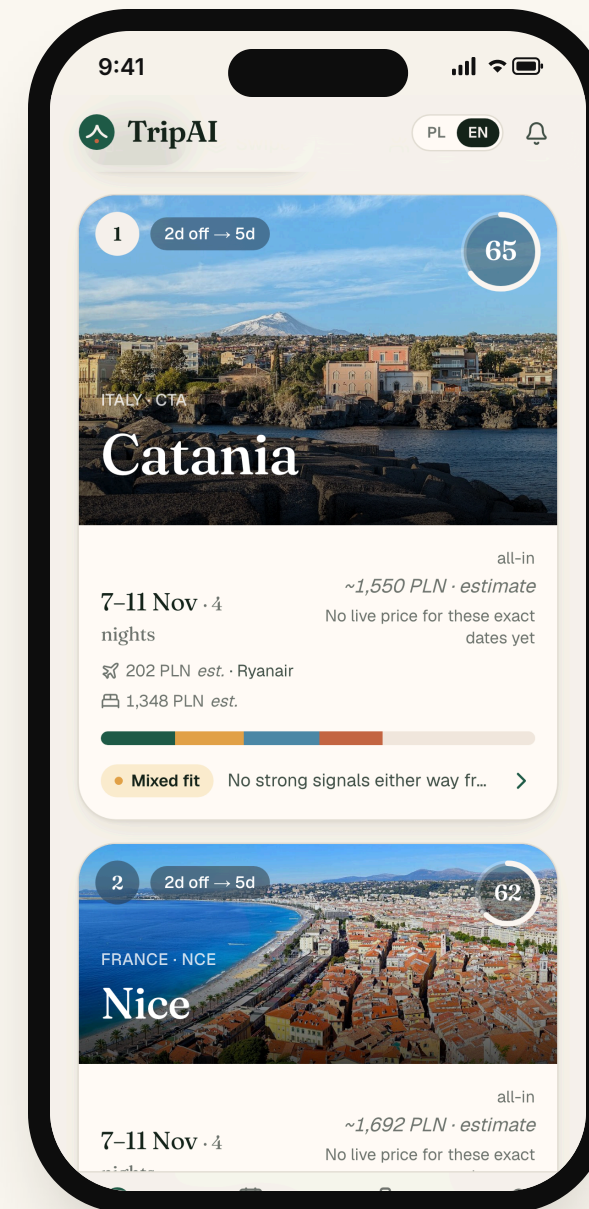

1 Travel DNA

3 Where + when

Ranked for those days

4 Why this trip

Fit, in plain words

Every price has a receipt

- Each price names its source
- Estimates are labelled as estimates
- Same inputs, same ranking

Return flight $\approx 202 \text{ PLN}$ est.

Google Travel Explore · fare seen for different dates... [↗](#)

Stay, 4 nights · $\approx 1,348 \text{ PLN}$ est.
city average

Google Travel Explore · city average, not a specific hot...

Total (estimate) $\sim 1,550 \text{ PLN}$

Ola's Catania trip, 7–11 Nov

How it works

1

Sourced data

Flights, hotels, weather, crowds, Polish holidays and bridge days

2

A fixed formula ranks

Price, weather, crowds, taste. The same every time.

3

AI checks the fit

A small model judges the fit. An LLM steps in only when it's unsure, and writes the "why".

AI never sets a price or the order.

A chat waits to be asked. TripAI keeps watching.

Starts from your free days

Every free window and every city, searched in one pass.

Shows its sources

Every price has a source.
Estimates say so.

Watches every day

A daily scan of your free days. It pings only when a find is worth it.

Google Flights, Kayak AI Mode, Mindtrip and eSky MAIA each cover a piece. None starts from your free days.

Built and tested

[Team name] · [Members]

We tested with real people. Nobody read the long descriptions, so we cut the text: price, label and fit at a glance.

937

automated tests

~2 s

to the first ranked trips

3

rounds of user testing

Built with Claude (Anthropic) coding agents. Prices and the ranking never come from an LLM.

We earn on bookings, never on ranking

Why people will use it

It starts from your free days, not a destination.
First results in about 2 seconds. A daily watch on your calendar, so the right weekend finds you.

How we make money

Free recommendations. A partner commission when you book: about 36 PLN on a 1,800 PLN trip at an assumed 2%. Premium at about 19 PLN/month for price alerts and group trips.

Long weekend 7–11 Nov. Where would you go?
